

PACK YOUR BAG THE RIGHT WAY

Before you choose a bag for any getaway, check your airline's website for exact size and weight limitations to avoid charges. (Each carrier has slightly different rules.) Packing is best done in two layers.

A

Fold trousers on their natural creases, laying the waistband on the left of the suitcase with the legs hanging over the right edge. Repeat this step, alternating sides.

B

Put socks and undergarments in plastic bags and tuck them in shoes or corners.

C

Wrap belts around inner perimeter.

D

Shoes and other heavy items go on the bottom (by wheels, if applicable), so weight is evenly distributed.

E

Tightly roll the rest of the clothes. This causes significantly fewer wrinkles and creates more space in the suitcase.

F

Bring trouser legs over the top so they're wrapped around rolled items.

G

Place toiletries, purses, other miscellaneous articles and anything you might immediately need on top.
