

# ALL OUR POWERBANKS HAVE THE FOLLOWING SPECIFICATIONS:

Overcharge protection

Over-discharge protection

Short circuit protection

Over-current protection

## SAFETY FIRST

### CE

All our power banks are tested by official institutes for CE and therefore comply with the strict regulations set within the EU.

### ROHS

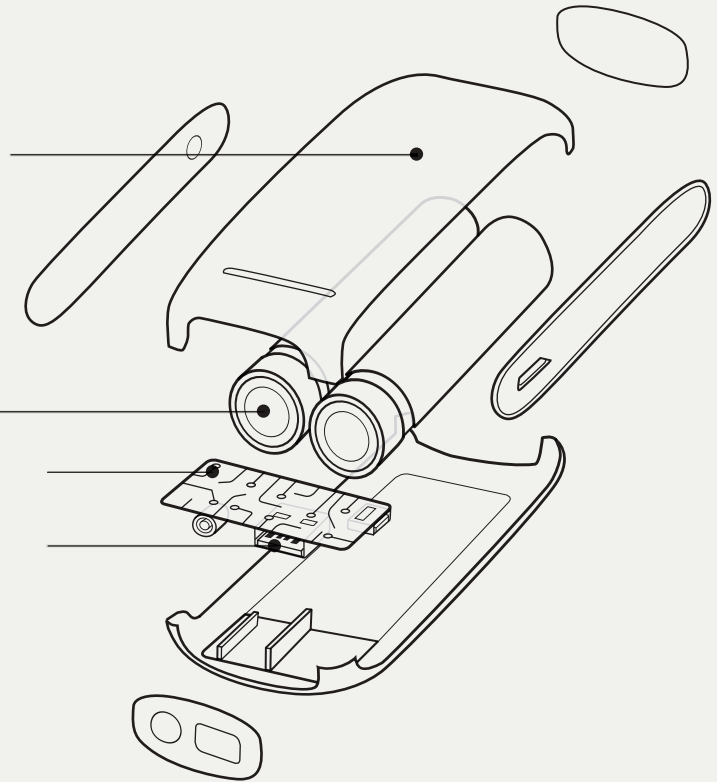

All our power banks are tested by official institutes to check they are manufactured according to the ROHS regulation and avoid items with high contents of chemicals entering the EU. We perform additional tests on each production for extra security.

Durable casing

A-Grade battery

High quality electronic components

Real input/output

## BETTER BATTERIES

### Better quality

We only use A-Grade batteries and do not accept B-Grade batteries at any stage. Therefore we demand that our suppliers only work with certified battery factories.

### Battery capacity

All our power banks come with the original mentioned capacity. This is tested before the battery goes into the actual power bank

### Battery life time

All power banks have a life time of at least 300 charging cycles because of the A-grade quality battery.

### Real input and output

All power banks have the real output and input as mentioned in our product description. This is tested multiple times during the production process.
