

BOX IT

CUSTOMER SAMPLE BOXES

Send out your samples from our warehouse in your own designed boxes! Send us your design or elements of your design and we will make a design-proposal for you.

Design tips

- Shipping labels will be placed on the bottom of the box where possible to not interfere with your design.
- A pattern or repetitive design works very well on all types of boxes.
- Always use a white background instead of large coloured backgrounds.
- We have 12 different sizes of sample boxes. When you create your own design, you only create it on 1 of the box sizes and our DTP team will match your design on the remaining boxes. We can only have a design on the lid of our largest boxes.

Examples

Example 1.
White background with green area and logo.

Example 2.
White background with blue logo.
