

# Just click it.

MagSafe™ is a new way of charging your mobile phone (iPhone 12 and up) by clicking the charger on the back of your phone. Both the phone as the charger have multiple magnets inside.

## What is MagSafe™?

MagSafe™ is a new charging technology for iPhone 12 and up.

MagSafe™ allows you to attach chargers and accessories to your iPhone by simply clicking it on the back of your phone.

## How does MagSafe™ work?

Both your iPhone 12 as the MagSafe™ charger/accessories have integrated magnets to make sure of perfect aligned and strong adhesion.

Our accessories come with high quality N52 magnets that ensure this strong adhesion. Avoid using accessories that don't use N52 magnets.

## Why do I need MagSafe™.

MagSafe™ accessories provide the user with a new user experience and take charging and accessories to the next level.

The optimal alignment assures that right charging position at all times. In the future more and more accessories will be compatible with MagSafe™ creating a new charging and accessories eco system.

## Extras.

- We use good quality heat resistant **N52 magnets** for good adhesion.
- The MagSafe™ charger maintains compatibility with **any Qi charging device**, so it can be used to wirelessly charge your **iPhone 8 or later models** as well as **Android models** and latest generation **AirPods**.
- The items and accessories are **PVC free**.
