

Brass hygienic zero contact keychain

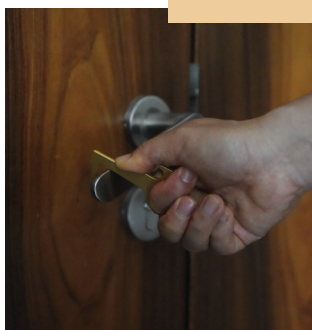

The less we touch
the safer we are!

Avoid touching potential infectious agents such as **door handles, press buttons** (for lifts, ATMs etc.) and **reduce the risk of contamination**. Use this **brass zero contact keychain**.

Button presser

Door hook

Bottle opener

Advantages of brass

Covid virus can only survive on brass for a couple of hours, compared to several days on plastic ¹

Antimicrobial: 83% less bacteria found on brass compared to plastic and stainless steel ²

Strong: unbreakable material compared to plastic

Durable: recyclable material (68% Copper & 32% zinc) compared to plastic
